

LIFT™

Liquid Interface Film Technology

ASIGA

Print up to twice as fast.

LIFT™ material trays from Asiga maintain a layer of unpolymerised liquid resin at the curing interface. This liquid interface reduces peeling forces, allowing smaller separation distances, faster printing times, and longer tray life.

Fast print speeds

Durable & long-life

Material freedom

LIFT™ material trays can be used with your existing Asiga printer without modification.
Available for the following Asiga printers: Max 2, MAX / MAX UV, MAX X

Contact your Asiga Reseller today and explore the benefits of the LIFT™ material trays from Asiga.
